Sir:

REQUEST FOR RECONSIDERATION

In response to the Office Action dated July 1, 2005, review and
reconsideration in view of the following remarks are respectfully requested.

The specification is objected to for addition of claims 1, 21, and 42 as
allegedly adding new matter. Claims 1, 21, and 42 are rejected under 35 U.S.C. §112,
first paragraph, for failure to comply with the written description. In particular, the
Patent Office asserts that the feature " wherein the microbeads are free of colorant" in
each of the cited claims is not supported by the specification as originally filed.

Applicants traverse both the objection and the rejection as follows.

The Patent Office points to language in the specification at page 11,
lines 11-15, as supporting colorants in the microbead. The passage relied on is as
follows:

The invention *does not require but permits* the use
or addition of a plurality of organic and inorganic materials
such as fillers, pigments, antiblocks, anti-stats, plasticizers,
dyes, stabilizers, nucleating agents, optical brighteners, etc.
These materials may be incorporated into the matrix
phases, into the dispersed phases, or may exist as separate
dispersed phases. ... (Emphasis added.)
